

Windows 10 Migration Tip Sheet

Microsoft provides plenty of resources to help companies migrate from Windows 7 to Windows 10. Go to the links below for a full set of instructions and video tutorials on executing the move to Windows 10.

The Modern Desktop Deployment Center provides resources and checklists to help you upgrade a single PC or thousands of PCs (using System Center Configuration Manager)

The first thing to do when migrating to Windows 10, of course, is inventory existing PCs. You'll need to know if there are some machines still hanging around that don't meet the Windows 10 minimum requirements. You can find those requirements here.
